

*Remember when this
was your only option...*

*Can now be
used outdoors!*

**Now at last a safer and more
productive alternative to steps,
ladders, podiums, indoor and out!**

HUGO

LIFT

To Buy or Rent

Platform Interlock Technology

Featuring *PI.T.*™ Patent pending, the only system on the market to automatically lock the gate when the platform is elevated; offering a new level of protection for the operator.

Storage Bins

Store items safely & conveniently for when they are required at height.

Simple Control Unit

Simple operator controls include:

- Lock & Go
- Up / Down
- Security key
- Safety stop
- Charge required indicator
- Tilt warning

HCT

Hydraulic cushioning technology for a soft and silent landing.

IEC

Involuntary elevation control protects the operator from continued raising of the platform in the event of motor contactor malfunction.

Fully Adjustable Shelf

Height adjustable cargo shelf with 50kg capacity, makes picking and carrying items safe & easy.

4Glide Wheel and Steer System

Non-marking wheels with the ability to select full swivel or directional lock for easy 90° turns. All-wheel braking. Easy to push on almost any surface.

AEB

Auto elevation braking applies the brakes when the platform is raised, even if the operator forgets!

Adjustable Stabilisers

Adjustable stabilisers are housed within the fork-pockets on Hugo Outdoor.

To Buy or Rent

HUGO LIFT

Use it for Cleaning, maintenance, stock replenishment, point of sale hanging or anything that requires work & reach at height. Applications are endless and include: Retail, Offices, Hospitals, Warehouses, Factories, Public buildings...ideal for Facilities Management.

Hugo™ is really easy to push and position, thanks to super efficient non-marking castors. Once in position simply press a button and you glide up to 4.2m working height.
